

A DIGITAL GROWTH PROPOSAL

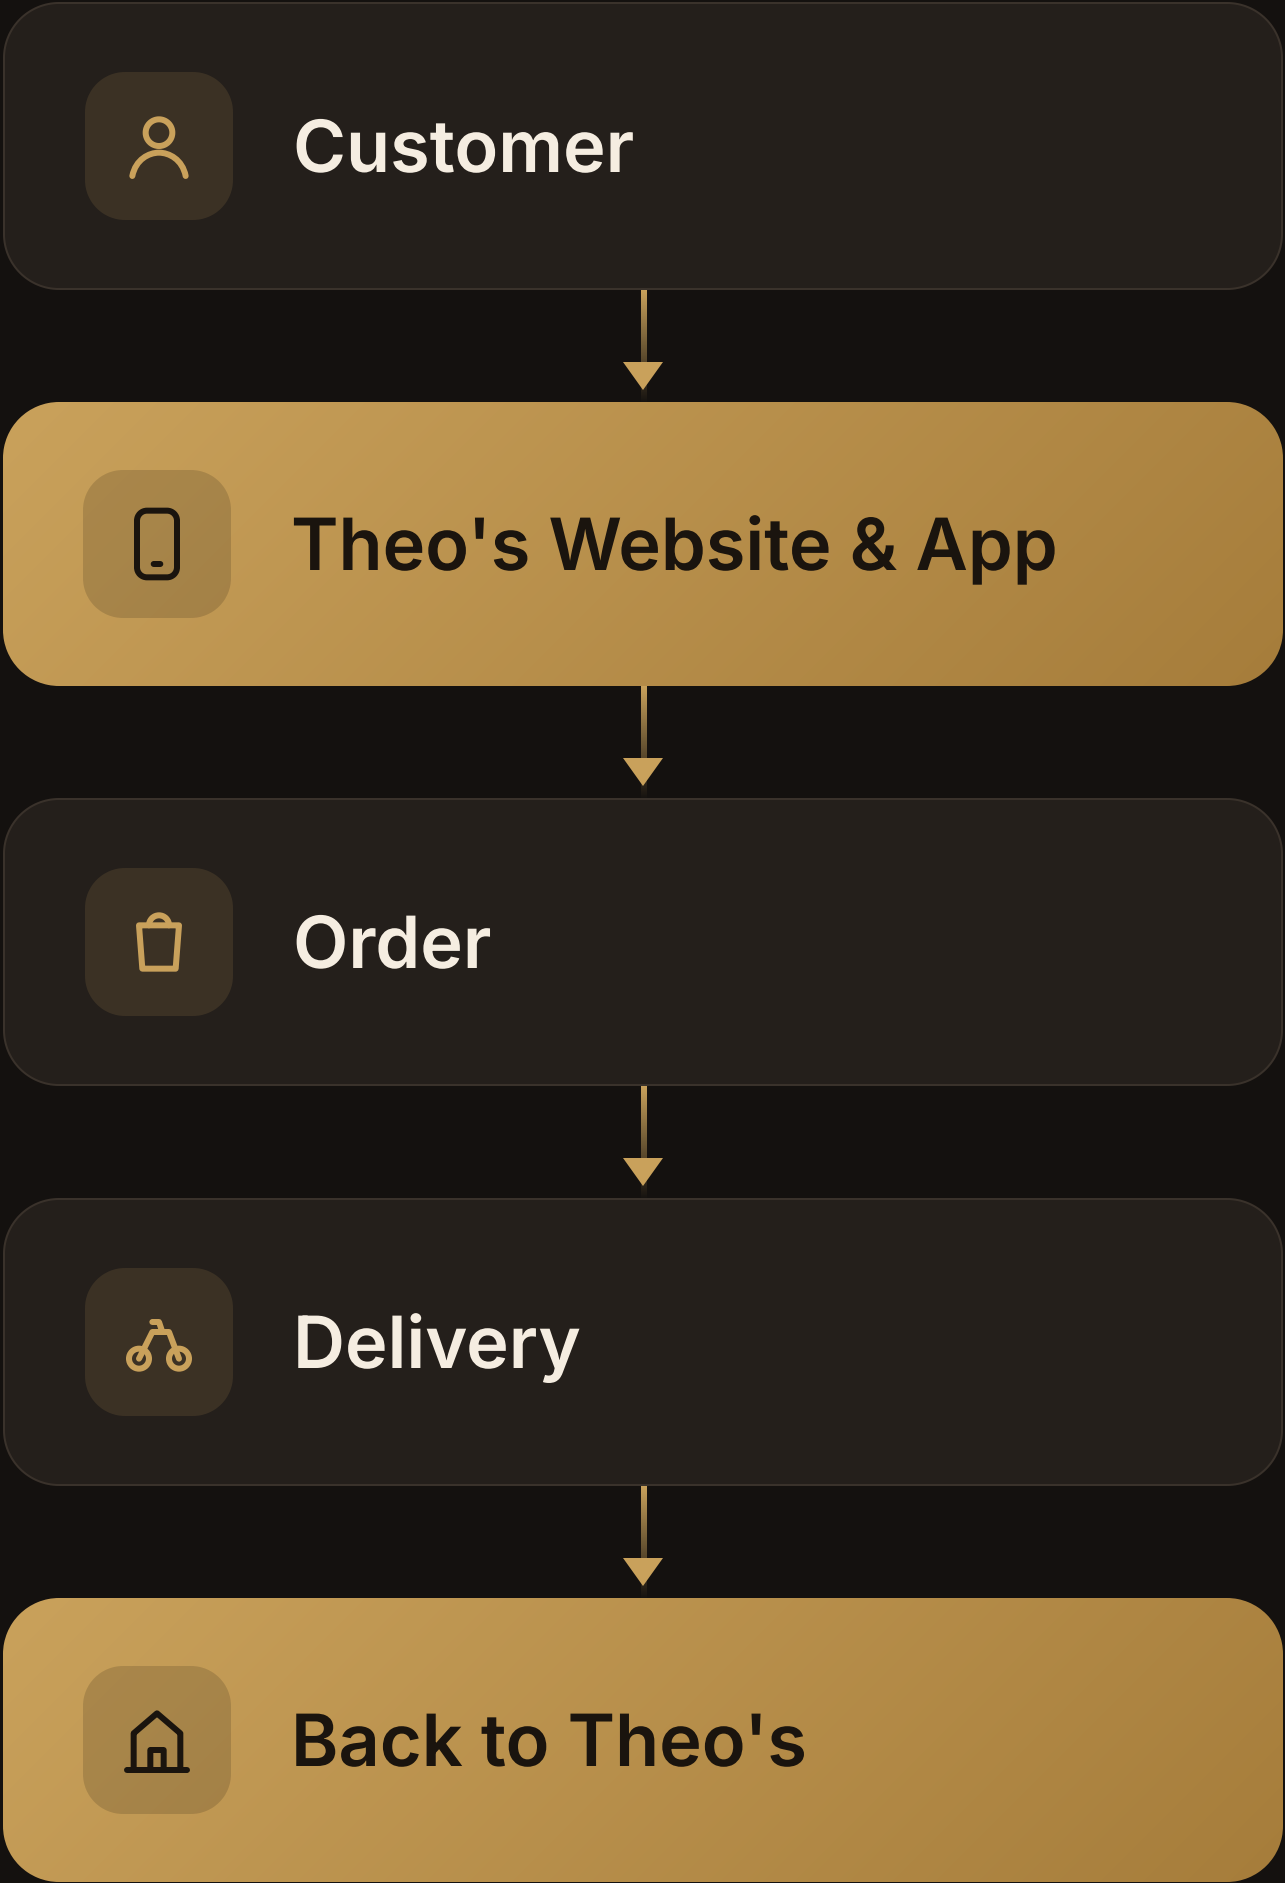

Theo's *Restaurant & Lounge*

From Restaurant to Digital Food Network

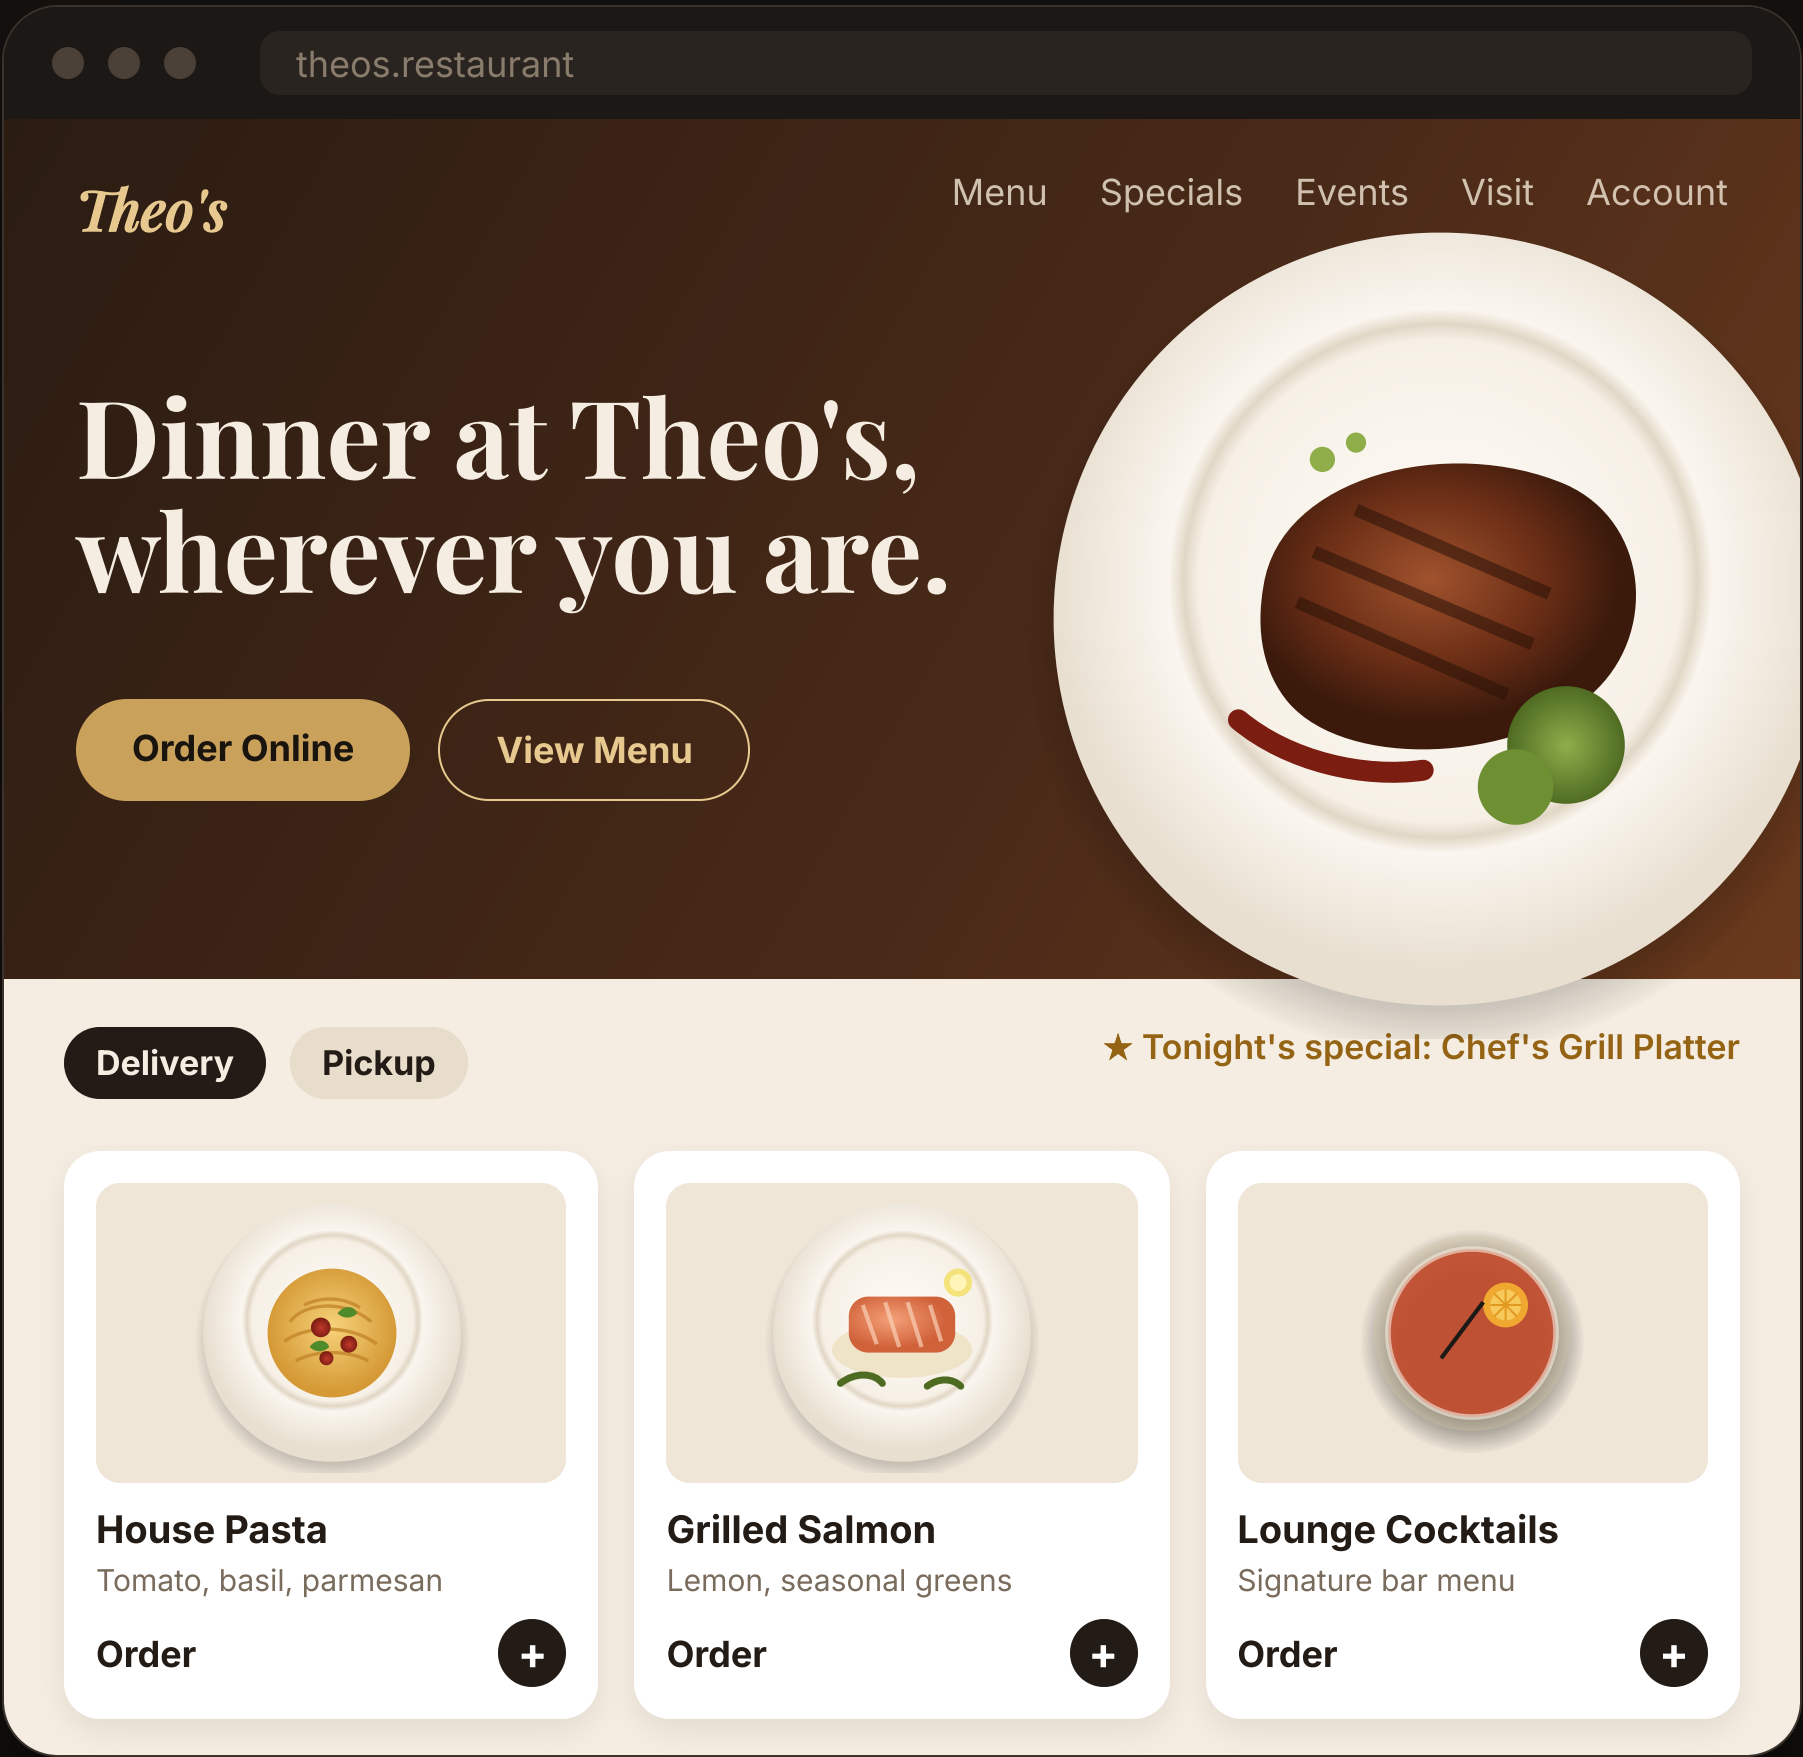

A modern online ordering, delivery and restaurant network
built around Theo's.

Your restaurant can be more than a *physical location*

Customers increasingly discover, browse and order from restaurants online. Theo's can own its own ordering channel — instead of relying entirely on third-party apps.

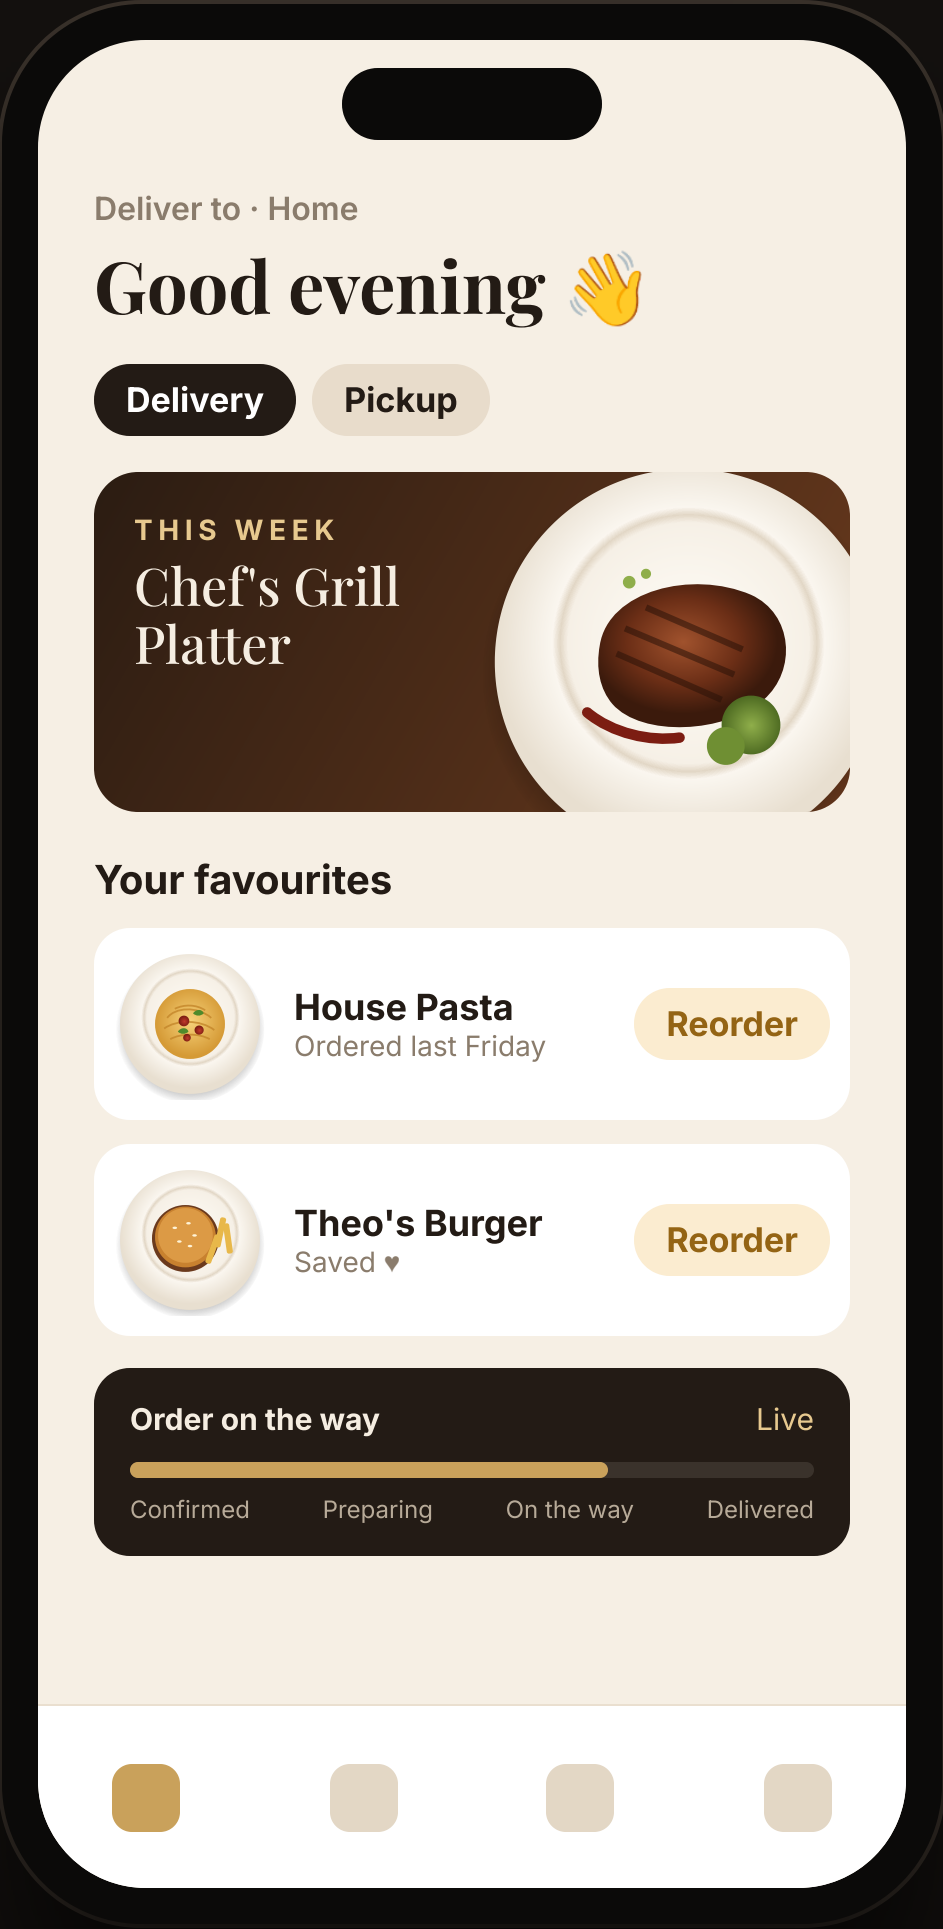

One place to *discover* and *order* from Theo's.

- Full digital menu
- Food photography
- Online ordering
- Pickup
- Delivery
- Specials
- Events
- Restaurant info
- Customer accounts
- Order history

Ordering from Theo's, as easy as *opening an app.*

Browse the menu

Order in seconds

Pickup or delivery

Save favourites

Save addresses

Track orders

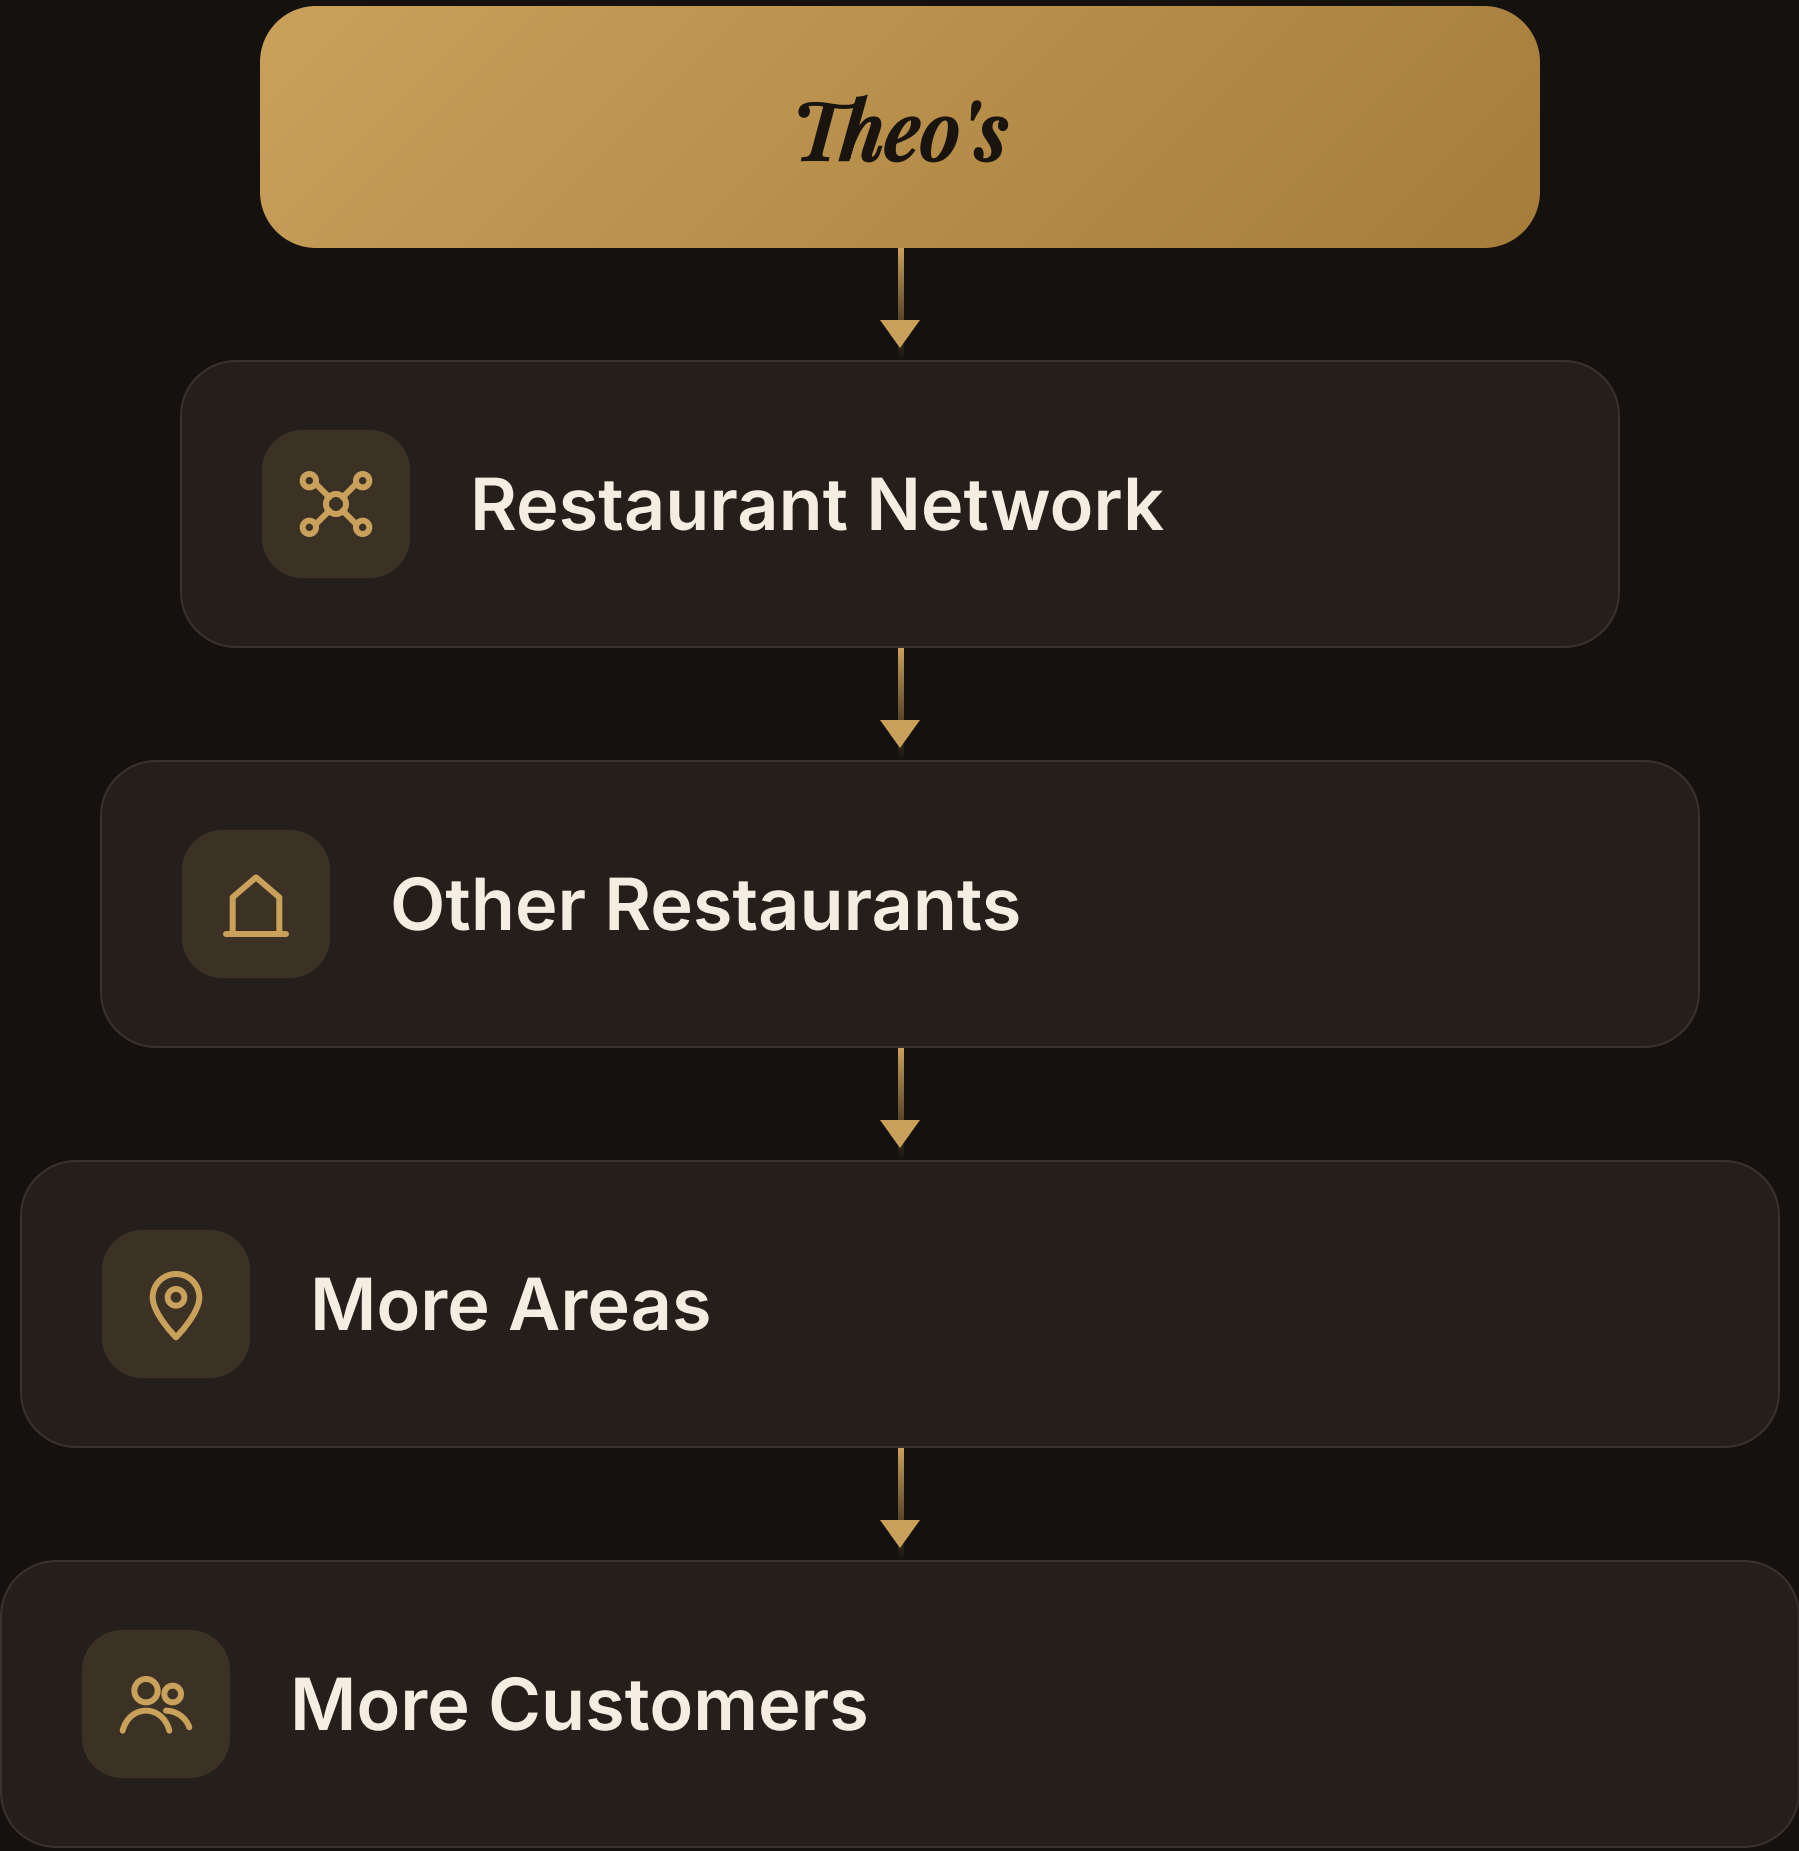

Notifications

One-tap reorder

Then Theo's can expand *beyond Theo's.*

Once the platform works for Theo's, other restaurants can join it over time — in new neighbourhoods and new areas.

A marketplace, *powered by Theo's.*

Partner restaurants can receive orders through the platform, while Theo's platform runs the digital marketplace behind them.

One control centre for the *entire network*.

Illustrative interface. Chart shows layout only, not real data.

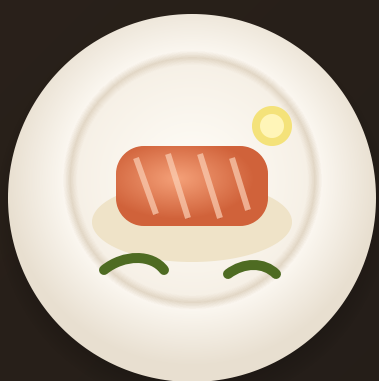

Grow *one step* at a time.

Theo's becomes the *first restaurant* on the platform.

Starting with one restaurant means the system is tested in the real world before it grows.

- ✓ Real customers
- ✓ Real orders
- ✓ Real menus
- ✓ Real delivery
- ✓ Real feedback

Then expand the platform based on *what actually works*.

Build the digital infrastructure *once*.
Start with Theo's.
Expand the network *over time*.

Let's build *Phase One*.

1 Theo's website

2 Digital menu

3 Online ordering

4 Delivery system

5 Customer experience

6 Foundation for the restaurant network

Start with Theo's.
Build toward the network.
